

## Sprint Backlog

EPIC	USER STORY				TASK		
Epic ID	User Story ID	As	I want	So that	Task ID	Description	Estimation
E02	US01	Coordinator	Upload courses and lessons to the catalog.	Employees are able to enroll in the courses.	T01	Define the data that will be used to create each course and lesson.	4
					T02	Create the model and the controller to manage courses and lessons.	6
					T03	Design and develop the catalog view.	15
					T04	Develop the form to add a course.	5
					T05	Develop the form to add a lesson.	3
					T06	Establish the rules to validate the data on the database.	2
E03	US01	Coordinator	Be able to upload files as support material for my lessons.	Make the courses more understandable and use the material as an extra help.	T01	Modify the model and the controller of the courses and lessons to add the files module.	6
					T02	Modify the forms to upload courses and lessons and add the buttons to upload different files.	5
					T03	Develop the module that allows to show the uploaded files.	10
					T04	Design the style to show the files.	5
	US02	Coordinator	Use support material with a certain file size limit or duration.	Not overload the courses or the employees with something that is too long or the machines don't support.	T01	Establish the limits of size and duration adding code to the modules of the files on the controller.	4
E05	US01	Coordinator	Access a section where I could find the data about the courses and the employees, inscriptions and expirations.	Have within reach all the information about the site and be able manage it.	T01	Implement the data table to show all the data that is in the platform.	4
					T02	Add the extensions, templates and API's to implement charts.	10
					T03	Select and modify with code which data will appear in which charts.	15
					T04	Design how the charts will be shown.	5
